**Greater career
opportunities!**

**Increase your
industry
knowledge.**

- This detailed 5-day (40 hours) training course will provide NDT technicians and quality control personnel with an extensive and thorough understanding of the production, composition and properties of metals.
- This knowledge obtained in this course will enable personnel to be prepared not only for industry requirements but also for the examinations of any NDT discipline in accordance with the requirements of CAN/CGSB-48_9712-2006.

What's Involved and What do I Get?

- World-class teaching and knowledge from our instructors who are recognized experts in their respective disciplines with extensive industrial hands-on experience as well as academic capabilities
- An opportunity to network with other NDT professionals
- Upon successful completion of the course the participant will receive a Certificate and an exam transcript.
- Current QCC members will receive a 10% discount.

The following topics will be covered:

- The major welding, casting and forging production methods, along with secondary processes, are presented. An in-depth review of the methods for the detection and evaluation of discontinuities and defects complements the knowledge required for any NDT method.

Pre-Requisites

- There are no pre-requisites for this course.
