Gain Knowledge to  
Cost-effective  
Welding Techniques

This three-day course (22.5 hours) is designed for Welding Supervisors who want to increase their knowledge of managing a Certified aluminum welding shop. This course is also of interest to engineers, shop foreman, quality assurance personnel or others who wish to understand the unique attributes of aluminum welding, and the requirements of certification.

### What's Involved and What Do I Get?

- World-class teaching and knowledge from our CWB instructors
- An opportunity to network with other welding professionals
- Lunch and refreshments each day of the course
- Upon successful completion of the course the participant will receive a Certificate of Attendance and an Examination Transcript

An opportunity to write the following examinations required to become a Qualified Supervisor:

- CSA Standard W47.2 (open-book examination)
- CSA Standard W59.2 (open-book examination)
- Welding Symbols
- Weld Faults
- Quality Control & Inspection Methods

The following topics will be covered:

- Requirements for aluminum shop certification, welder testing and procedure testing
- Requirements of the aluminum fabrication standard including inspection of welded product, general fabrication practices, base metal preparation, and joint tolerances, etc.
- An overview weld symbols, quality control practices and common inspection methods

### Prerequisites

- There are no prerequisites for this course
- Please note: CSA Standards W47.2:1987 and W59.2:1991 are required to be brought to the course for use in the open-book examinations
